DETAILED ACTION

Drawings

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the step of forming an opening in the tamper-evident structure and the step of forming an area of weakness in the tamper-evident structure must be shown or the features canceled from the claims. No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claim 40 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor, at the time the application was filed, had possession of the claimed invention. The specification, as originally filed, fails to provide antecedent basis for the tamper-evident structure "encasing a first portion of the zipper closure" and the step of "forming an opening in the tamper-evident structure". This is a new matter rejection.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

5. Claim 40 is rejected under 35 U.S.C. 102(e) as being clearly anticipated by U.S. Patent Nos. 6,273,607, 6,290,390 and 6,347,885; all to Buchman.

Response to Amendment

6. As stated by applicant in the remarks filed 07/29/2003, "Moreover, Claim 40 corresponds to Claim 43 from parent application serial no. 10/040,117,..., this claim was originally copied on April 2, 2002,..." However, the subject matter of claim 40, and thus claim 43 of parent application no. 10/040,117, raise the issue of new matter as discussed above. Therefore, the effective filing date of the subject matter in claim 40 is considered to be 04/02/2002, which is after the filing dates of U.S. Patent Nos. 6,273,607, 6,290,390 and 6,347,885.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
